Advisors

The *Lancet Global Health Commission* on Medical Oxygen Security was announced on 23 September 2022 to address major gaps in oxygen research, mobilize a broad coalition to implement best practices to close the gaps, and strengthen oxygen systems to reduce mortality and morbidity globally. The following 40 experts, representing a variety of academic disciplines and geographic locations, will serve as the Advisory Group to guide the Commissioners and Executive Committee to publication of the Commission report in 2025 and to impact beyond.

Advisory Group members are listed in alphabetical order of last name.
